MidDel Consulting is looking for Energy Consultants to join our team!

MidDel Consulting is a System Integrator and Professional Services firm with deep knowledge and experience in the energy industry. We partner with our clients and solve problems by getting the right information to the business when they need it.

MidDel consultants are the core of our business, and they tackle challenging and exciting opportunities daily for our clients.

Job description:

MidDel is seeking a highly analytical and detail-oriented team player to join our group either as a Junior or Senior Consultant, depending upon experience. The successful candidate will work in a customer facing role driving system implementations and providing overall client support. Ideal candidates will have business and functional expertise in some or all of the following markets: Power, Gas, Crude, Refined Products. Responsibilities for this role will vary from client to client. Therefore, the ideal candidate must be able to successfully navigate shifting priorities and project roles.

Desired Skills & Experience:

- Minimum of 5 years of experience in commodity risk management or related field work
- Experience on 5 or more projects is preferred
- Proficient knowledge in some or all of the following markets: Power, Natural Gas, Crude, Refined Products
- Excellent written and verbal communication skills; ability to express ideas to a variety of audiences
- Business Analysis experience – including process design, requirements definition, test case development, and change management
- Proven analytical and problem-solving skills
- ETRM system experience with Openlink or Allegro is an asset
- Solid understanding of commodity valuation and mark to market of derivative instruments
- Working knowledge of market and credit risk management
- Strong grasp of skills and functions performed by the Front, Mid, and Back Office roles within a trading organization. Knowledge of SOX controls is a plus.
- Self-starter, highly motivated, result oriented
- Willingness to travel

Responsibilities:

- Execute MidDel's proven project methodology during the lifecycle of the project including change control, support, and escalation
- Assist Project manager in setting customer expectations around timelines and associated deliverables

- Consultant will be responsible for managing and communicating issues to internal and client project teams
- Analyze client business process to identify and understand requirements applying best practice solutions
- Serve as a liaison between business and technology teams to ensure that requirements are translated and understood from a technical and functional perspective
- Write requirement specifications and associated functional test cases
- Management of system tests and user acceptance tests
- Provide input for assessment and direction for software selection and modifications of existing system landscapes
- Ensure the highest level of customer support

Compensation:

MidDel offers an excellent compensation package that includes base salary, a generous bonus package and benefits.

*MidDel Consulting provides equal employment opportunities to all employees and applicants for employment and prohibits discrimination and harassment of any type without regard to race, color, religion, age, sex, national origin, disability status, genetics, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state or local laws.*

*This policy applies to all terms and conditions of employment, including recruiting, hiring, placement, promotion, termination, layoff, recall, transfer, leaves of absence, compensation and training.*
